PROFILE

Leader • Content & Media Technology Specialist • Innovator • Machine Learning & Data Science • Software Engineer • Technology Evangelist & Educator.

Passion for building diverse teams & collaborating with business partners to rapidly deliver value. • Works under pressure & delivers on time & on target. • Broad experience leading, architecting & implementing software solutions. • Expert in leveraging emerging tech & R&D to launch V1 products to production at scale. • Media production & marketing experience with video, photography, graphic design, & web. • International experience in the U.S., Central America, Asia, Africa, & the Middle East.

EXPERIENCE

THE WALT DISNEY COMPANY • 11 YEARS • GREATER SEATTLE AREA

Sr. Manager Engineering, Content Technology — Nov. 2018–Present
Building next generation solutions at the intersection of content & technology. Providing automation & tools for content creators & workflows at scale. Leveraging data & automation to generate broadcast quality, highly personalized content.

Sr. Manager Engineering, Emerging Tech Solutions — 2015-2018
Learned & leveraged AI & Machine Learning, Data Science, Cloud Platforms, Containerization and a passion for CI/CD & security to build innovative solutions in practical ways. Ran innovation program for ~250+ engineers across 2 VPs & twice-yearly innovation hack weeks.

Manager Engineering (IoT), Playmation™ — 2013-2015
Hired & built a high performing full stack team of 30+ including engineers, testers & PMs. Incubated, prototyped, developed & launched the IoT Storyware™ platform & OS powering Playmation™ connected "toys" sold in retail stores on an extremely aggressive schedule.

Manager Engineering, Mobile & Connected Devices — 2012-2015
Developed the first secure HTML5 video streaming service to support ESPN international live streaming for sports. RESTful Service APIs, Online Video, & HTML5.

Sr. Software Engineer - Video Streaming & Mobile Services — 2008-2012
Lead software engineer. Developed frontend video player framework used across company. Developed & supported backend java platforms for mobile, web, OTT video solutions.

Media Producer · Flash Developer · QA Tester — 2008-2012
Online Advertising for the ABC.com Full Episode Player. (contract position)
